(An Autonomous Institution, Accredited by NBA of AICTE, NAAC of UGC & an ISO9001:2015 Institution)

Yantra yochana

The event is about presenting a PowerPoint presentation regarding the new innovations and their mechanisms in different components focusing on automobile industries. Such as in olden days there would be a different type of working systems and now it has gone under several changes for better efficiency. Different mechanisms for better performance and productivity for future. In the same way each team should come up with a presentation of the component in which they had done their modifications to increase its efficiency for better future.

Guidelines of the Event:

1. Presentation consists of scores overall to 180 points.
2. Team should consist of two-five participants.
3. Participants must bring their presentation.
4. Basing upon the relatability of the problem selected to the daily life 20 points will be awarded.
